

Active DMAE and Collagen Liposome Complex

Catalog: Lipo-223C

PRODUCT INFORMATION

Name Active DMAE and Collagen Liposome Complex

Cat No. Lipo-223C

Product Overview

This formulation contains liposomes made of phospholipids from soy lecithin DMAE and Hydrolyzed Collagen. The liposomal delivery system protects the active ingredient making it to reaches the target cells more efficiently. Collagen helps improve brightness of the skin, as well as increases elasticity and smoothness. DMAE is known to have skin tightening effects. In several clinical studies, it successfully reduced wrinkles, improved lip fullness, and tightened neck skin. Overall, DMAE has a skin lifting effect. This product is intended to produce specific lotions creams and gels. Product designed to be used in cosmetic formulation in the range of 5 to 10 % respect to the final product.
