

Belinostat Loaded Liposomes

Catalog: Lipo-015RG

PRODUCT INFORMATION

Name	Belinostat Loaded Liposomes
Cat No.	Lipo-015RG
Product Overview	Belinostat (PXD101, NSC726630, PX-105684) is a novel HDAC inhibitor with IC50 of 27 nM in a cell-free assay, with activity demonstrated in cisplatin-resistant tumors. Belinostat (PXD101) induces autophagy. This product is a PEG modified pre-formulated liposome with Belinostat (PXD101) loaded. It is supplied ready to use in vitro or in vivo studies.
Lipid Composition	/
Active Ingredients	Belinostat
Form	Liquid
Storage Buffer	292 mM sucrose, 0.5% DPBS (1X)
Concentration	3.1 mg/mL (Belinostat Concentration); Lipid Concentration 60 mM
Stability	1 month
Storage	2 °C to 8 °C (do not freeze)
