

Lyophilized PS/CHOL ATP Liposome

Catalog: Lipo-230RG

PRODUCT INFORMATION

Name Lyophilized PS/CHOL ATP Liposome

Cat No. Lipo-230RG

Product Overview

The encapsulation of ATP in liposomes markedly promotes its effectiveness by preventing the hydrolysis by extracellular enzymes, increasing ATP circulation time and enhancing its intracellular penetration. ATP liposomes can be used in various models such as myocardial, liver, retina and wound healing ischemia. Studies have shown the ability of liposomal encapsulated ATP to prevent cell death and tissue dysfunction following ischemic events. The concentration of encapsulated ATP is 0.5 μ mol/vial.
