

Plain Control Liposomes for PEGylated Liposomal Doxorubicin HCl (2.0mg/mL)

Catalog: CON-072L

PRODUCT INFORMATION

Name	Plain Control Liposomes for PEGylated Liposomal Doxorubicin HCl (2.0mg/mL)
Cat No.	CON-072L
Product Overview	This is the plain negative control liposomes for the 2.0mg/mL doxorubicin HCl. It has a lipid concentration of 20mM lipid concentration. It contains the same lipid composition and the drug loading battery, 250mM ammonium sulfate inside the liposomes. Lipid composition: HSPC/CHOL/mPEG2000-DSPE (56.2:38.5:5.3 mol/mol) Mean particle size: 85 nm (80-90 nm)
Lipid Composition	HSPC/CHOL/mPEG2000-DSPE
Active Ingredients	N/A
Application	Liposome production; Synthetic lipid
